

DecoWood Colour Series

With over 150 DecoWood woodgrain finishes available, there is always a colour to match your project. To help guide your colour selection, we have developed the exclusive DecoWood Colour Series featuring a range of our favourite native, contemporary and exotic timber species. The series includes 30 natural woodgrain finishes that represent timbers from across the world. If your preferred timber finish is not listed, contact us so we can colour match a finish to suit your project needs.

Please note: Images displayed on your computer screen or printed in our catalogue may vary in colour from the actual DecoWood colour. **Contact us** for a **free sample** of your chosen finish.
